

REAL PETFOOD DOG PUPPY

The Real Petfood series is a luxury complete pet food which provides a balanced diet for cats and dogs at all levels of activity. The Real Petfood series is made from the best quality ingredients with a high biological value. Protein sources such as egg, fish and chicken, together with fat/oil from fish, chicken and plants form the foundation of the series.

Real Petfood has been developed in collaboration with veterinarians and leading breeders and in accordance with the latest research and international standards (AAFCO).

Real Petfood Puppy is for puppies, although it is also ideal for pregnant and nursing bitches. The food is suitable for both small and large breeds of puppy. The following should be emphasised:

- The food is extruded to promote digestibility.
- Contains carefully selected proteins and is suitable for the prevention of allergies in puppies
- It is gentle on the puppy's stomach and digestive system, prevents sudden gas production and can in many cases be used in a protective diet
- A balanced content of Omega 3 and Omega 6 fatty acids gives the puppy a healthy, shiny coat.

Ingredients: Chicken, wheat, barley, maize, fish, beet fibre, linseed, milk, egg, vegetable oil, yeast, lecithin, lysin, minerals, vitamins and antioxidants.

The table shows the combination of contents which make Real Petfood Puppy a first class dog food.
